PERSONAL PROJECTS

Market sizing or guesstimate using case study

(02/2022 - 03/2022)

- helped me in learning different problems by breaking down into 4 parts and finally consolidate into a final result.

Value based prioritization (03/2022 - 04/2022)

- helped me in learning the value of urgency by dividing into four parts - urgent and important, important but not urgent, urgent or not important, not urgent not important

Minimizing Churn Rate through financial habits

(04/2023 - 06/2023)

- Churn rate is analysed using the best model. Random forest classifier is the best model to analyze the Churn Rate. As we compare all three models logistics regression support, vector machine and random forest
