## Create a new fork

A fork is a copy of a repository. Forking a repository allows you to freely experiment with changes without affecting the original project. [View existing forks.](#)

Required fields are marked with an asterisk (\*).

Owner \* [Abinash-ray](#) / Repository name \*

✓ wipro\_fork33 is available.

By default, forks are named the same as their upstream repository. You can customize the name to distinguish it further.

Description (optional)

☒ Copy the `main` branch only

Contribute back to Farhan1430/wipro\_fork by adding your own branch. [Learn more.](#)

① You are creating a fork in your personal account.

Create fork
